

World Federation of Associations of Pediatric Surgeons

Sub-Committee in Education

Dear colleagues,

You are cordially invited to attend the Live Workshop **ADVANCES IN PEDIATRIC SURGERY** which will take place at Chittagong Medical College & Hospital in Bangladesh November 23 -25, 2010. The workshop will be organized by Professor Tahmina Banu, head of Pediatric surgery in Chittagong and will be held under the auspices of the World Federation of Associations of Pediatric Surgeons (WOFAPS).

The aim of the workshop is to provide knowledge on various topics for trainees as well as for experienced pediatric surgeons from Bangladesh and neighbouring countries. International experts have been selected by Prof. Banu. They will present lectures on topics such as biliary and anorectal malformations including Hirschsprung's disease. At a time when minimally invasive pediatric surgery has evolved as a standard technique, in many countries, training remains a challenge. Therefore, the aim of this workshop is also to present live operations and a lively discussion with experts.

Pediatric surgeons from countries with limited resources often cannot travel and attend international congresses. This is simply too expensive. Therefore, the WOFAPS Sub-Committee in Education strongly supports workshops and other programs with international experts coming to local pediatric surgical communities to share their experience. This workshop fits perfectly into this concept.

Looking very much forward seeing you in Chittagong

Prof. Benno Ure
Chairman of the WOFAPS Sub-Committee in Education

World Federation of Associations of Pediatric Surgeons
